# Power Products

Global Power  
Solution™

# A powerful response

**SDMO is recognised as one of the top manufacturers of generating sets in the world.**

SDMO has channelled all its energy into designing a range which is both highly competitive and high-performance, the largest range available on the market. As a response to the increasingly precise nature of your energy requirements, which relate directly to the special traits of your particular industry, SDMO is devoting the majority of its resources to the continuous improvement of its range and services.

The result of a strategy focussed on a single industry: a professional requirement which guarantees you a reliable source of energy, complying with the strictest of standards. The pioneering mindset of its teams, and the mastery and flexibility of its production methods mean that SDMO is constantly innovating. The proximity of its distribution network and dynamism of its customer services policy enable SDMO to be a powerful force and provide the basis of the company's values.

**SDMO, the source of energy for your comfort and safety.  
SDMO, providing energy to connect people.**

whatever  
the energy required

Whether you require emergency power to be able to cope with potential power cuts (e.g. hospitals, shopping centres) or continuous power when conventional electrical grids are faulty (power plants), SDMO will be able to offer you performance products from a large range which meets all the requirements of different markets. This range comprises 3 main categories:

- **Standard products** (Portable Power, Residential Power, Power Products and Rental Power)
- **Expertise and Services** (Power Solutions, Training, Spare Parts, Technical Assistance)
- **Related products** (Nexys, Telys, Kerys command/control units)

## National coverage, international presence, “think globally, act locally”

In order that SDMO can continue to grow and expand into new markets, it relies on:

- a distribution network present in over 150 countries,
- 8 overseas subsidiaries,
- 4 offices,
- 7 sales offices and 3 regional HQs in France.

The reactivity of the company is based on its 5 storage platforms which, in co-operation with the subsidiaries, make for an efficient commercial network.

The links forged with the Kolher group have strengthened SDMO's standing amongst its customers through a strategy of synergistic installations.

● SDMO Head Office ● SDMO locations ● Agents/Distributors ● SDMO Stock

## Market logic for greater reactivity

The production plants in Brest are organised according to product lines relating to the product range offered:

- a production site for Portable Power generating sets and for Power Products with lower power,
- a production site for Power Products, Rental Power and Residential Power ranges,
- a production site used for the production of special Power Solutions applications.

This overall synergy between the industrial teams and sales and marketing departments reinforces the position of SDMO: prescription, responsiveness, presence on the major markets.

## INTRODUCTION

SDMO offers a solution to make standard generating sets available more quickly.

Thirty 50 Hz models from 12 to 1900 kVA and twenty-six 60 Hz models from 11 to 550 kW in the Power Products range are in stock world-wide and can be delivered to you within very short lead times. These generating sets are available in open or covered versions.

Aftermarket options are available to order (silencers, normal/emergency switches, Genservice 500 etc.)

**SDMO PLUS PRODUCT**

**Responsiveness**  
Simply contact our sales department for an immediate update on lead times for availability.

**Lead time**  
Availability in stock platform.  
Rapid availability.

**Price**  
Available at the standard RRP for the same configuration.

## PLANNING

## PRODUCTION

## STORAGE

Ordering a generating set during the planning or production phase = available as soon as possible

Ordering a generating set available on the platform = available immediately

## INTRODUCTION

## NEXYS

The NEXYS, SDMO's entry-level control unit, allows for operation in both manual and automatic mode. Modular in design, it offers high-quality basic functions, allowing easy and reliable operation of your generating set.

11

## OPERATION AND PROTECTION

### Symbols for operation, alarms and faults

### Operation

- 3 + 9 AUTO operation
- 4 + 9 Air preheating
- 5 + 10 Fuel Level
- 6 + 11 Coolant temperature
- 7 + 12 Oil pressure
- 8 + 11 Battery voltage

### Alarms and faults

- 1 Overspeed
- 2 Fail to start
- 5 Low fuel level
- 6 Coolant temperature
- 7 Oil pressure
- 8 Charging alternator

## MEASUREMENTS

### Standard LCD display

Frequency (Hz)  
Battery voltage (V)  
Time<sup>(1)</sup>(s)

Working hours counter  
1<sup>st</sup> line: Hours  
2<sup>nd</sup> line: 10<sup>th</sup> of an hour  
Time<sup>(1)</sup>(s)

Generating set speed  
(rpm)  
Battery voltage (V)  
Time<sup>(1)</sup>(s)

(1) Air preheating, start-up attempt, micro-disconnection, mains return

## INTRODUCTION

Telys, SDMO's flagship product, integrates new options and offers improved ergonomics and a more user-friendly design. It is even more straightforward, with the emphasis on communication (USB connections, PC connections, control software and remote operation).

Its design, inspired by the NEXYS, has reduced the number of buttons to offer you simplicity when operating your generating set. It also offers new functions:

- Integrated maintenance monitoring programme (on-screen display of required maintenance operations)

- On-board service tool to guide the user when an alarm or fault is detected

- Viewing and remote control functions with option to send (b) an email, text message or fax in the event of an alarm or fault

- Card tropicalisation possible to compensate for extremely humid conditions (b)

- Compliance with numerous legal and regulatory requirements (EC)

- Screen with contrast which adjusts to all types of light

(b) As an option

Display screen composed of 4 zones:

**ZONE 1:** Operation mode (generating set running/auto/manual)

**ZONE 2:** Display of functions via pictograms

**ZONE 3:** Display of mechanical and electrical values and the associated measurements

**ZONE 4:** Operating messages and parameter settings menu

**SDMO  
PLUS  
PRODUCT**

The Telys can now be fitted with viewing and remote control options, allowing the generating set to be actively monitored and managed for greater safety.

## INTRODUCTION

## KERYS TACTIL

The KERYS Tactil is a user-friendly, easy to grasp tool, offering a wide range of functions. It is fitted as standard to all generating sets designed for coupling applications, and can be fitted as an option, from 200 kVA, to the rest of our applications. So that all the requirements of high and low voltage power plants can be met, the KERYS Tactil can be built into the console, fitted directly onto the generating set or on a separate cabinet. It complies with CE, UL and CSA standards.

Display screen  
7.4 inch LCD TFT display  
Detailed colour display  
Touch screen  
Dimensions: 154 x 86 mm

Configuration keypad  
For setting parameters, navigation and direct access to screens

### Control keypad with display LEDs

Manual mode selection  
Stop mode selection  
Automatic mode selection  
Generating set circuit breaker open/close  
Test activation/deactivation  
Grid circuit breaker open/close  
LED test  
Horn off  
Clear faults

Arrow keys with operation LEDs

13

The KERYS Tactil has a TFT screen which offers an ergonomic interface for configuration, operation and fault finding.

## ADDITIONAL SPECIFICATIONS

### Measurements

Power factor in the different screens  
Active and reactive powers  
Synchronism (difference in phase, voltage and frequency)  
Harmonics in voltage and current

### Safety features

Overload, short circuit  
Phase current direction  
Neutral current  
Reverse component  
Voltage reserve  
Thermal image  
Presence and absence of voltage  
Maximum active power  
Active and reactive power return  
Homo-polar current and homo-polar current direction  
Restricted earth and homo-polar voltage  
Vector jump, min Z and df/dt

### Synchronisation

Manual and automatic  
Frequency and voltage equalisation

### Control

Speed and voltage  
Switching frequency and voltage set values  
Adjusting frequency and voltage set values  
Adjusting active and reactive power set values  
Active and reactive power surge keyway  
Active and reactive power distribution  
Active and reactive power return setting  
Manual control of speed and voltage regulations

### Communication

In local mode or remote mode  
Built-in web server  
Via RS485 connection  
Via Ethernet (in local mode) and Internet (in remote mode)

### Plus points integrated as standard

Fault finding aid  
Assistance and maintenance (history, sending of emails, etc.)  
Mechanical and electrical parameter archives and curves  
Load impact management  
Addition of supplementary software without external tool

### Configurations

A612: Generating set without grid  
A622: Generating set with normal/emergency switch and grid without coupling  
A633: Production plant without grid  
A641: Generating set with permanent coupling to grid without normal/emergency switch - Grid coupling + resale  
A642: Generating set with permanent coupling to grid without normal/emergency switch - Grid coupling + power level 0 kW on the grid  
A651: Generating set with temporary coupling to grid and normal/emergency switch  
A661: Generating set with permanent coupling to grid and normal/emergency switch

Display screen showing electrical values

## REMOTE OPERATION AND CONTROL

The KERYS Tactil is supplied as standard with integrated operational software. The 60 screen options give you complete control over your installation, regardless of the distance (operation and parameter setting).

# power modules

## SPECIFICATIONS

### Power modules in the console

Up to 630A, the power modules are integrated into the consoles\*. The extra-flexible cables between the console and the alternator are fitted in a corrugated insulating sleeve.

\* When the motorised control option is selected, the Power module is positioned in AIPR

## CONSOLES AND AIPR

POWER OUTPUT	3 poles	4 poles
Modular circuit breaker or fixed unit from 10A to 125A	X <sup>(1)</sup>	●
Fixed unit circuit breaker 160A to 630A	●	○

(1) As standard for some neutral connections

● Standard

# Normal/emergency switches

## INTRODUCTION

SDMO offers a new normal/emergency switch for equipment rated from 35 to 160A: VERSO. For equipment with higher ratings, the existing normal/emergency switch coupled to a new version of the TSI module is still available.

		VERSO						TSI									
		35A	63A	80A	100A	125A	160A	200A	250A	400A	630A	800A	1000A	1600A	2000A <sup>(1)</sup>	2500A <sup>(1)</sup>	3150A <sup>(1)</sup>
Dimensions	Heights (mm)	400	400	400	400	400	400	800	800	800	800	1000	1000	1000	1800 <sup>(2)</sup>	1800 <sup>(2)</sup>	1800 <sup>(2)</sup>
	Width (mm)	400	400	400	400	400	400	600	600	600	600	800	800	800	1000	1000	1000
	Depth (mm)	200	200	200	200	200	200	200	400	400	400	400	500	500	500	800	800

(1) Integrated into a floor-mounted control box

(2) On a base plate h=200 mm, i.e. control box of height 1600 + 200

## INTRODUCTION

## VERSO

VERSO is not only a changeover switch but it also features integrated mains detection and enables automatic start-up and operation of the generating set in the event of a mains power cut.

To increase the reliability and safety of our changeover system, VERSO now enables switch changeover. This unit has tetrapolar operation, with voltages from 208 to 440V. The design of the control units enables even cables with large cross sections to be easily connected. The control unit can be opened via the front panel and both side panels, providing easy access to the terminal connections. Direct access to the main setting controls means that it is simple to use and any possible configuration modifications can be made easily.

15

### Switch configuration

- A** Three phase
- B** Single phase
- C** 50 Hz
- D** 60 Hz
- E** Switch from grid directly to the generating set
- F** Switch from grid to the generating set via point 0
- G** For France only
- H** Use

**SDMO PLUS PRODUCT**

For greater protection, VERSO can be locked in the neutral position during maintenance phases, using a padlock

**SDMO PLUS PRODUCT**

This manual control is used to change over the switch in the event of an electrical control fault

## INTRODUCTION

## TSI

Both innovative and original in design, the TSI is perfectly suited to applications where the transfer of a main source to a replacement source is crucial for the running of your installations.

Straightforward and easy to use, the special feature of this module is that it is automatically configured when voltage is provided from the grid side.

By simply pressing the AUTO key, the following parameters are configured: grid voltage, voltage min/max thresholds, type of use, frequency min/max thresholds.

Electronic switching of the power source means that the unit can be continuously self-supplied.
